Data Analysis

SQL Finance and Supply Chain Analytics of AtliQ Hardware

Shivam Tiwari

About AtliQ Hardware and Problem Statement

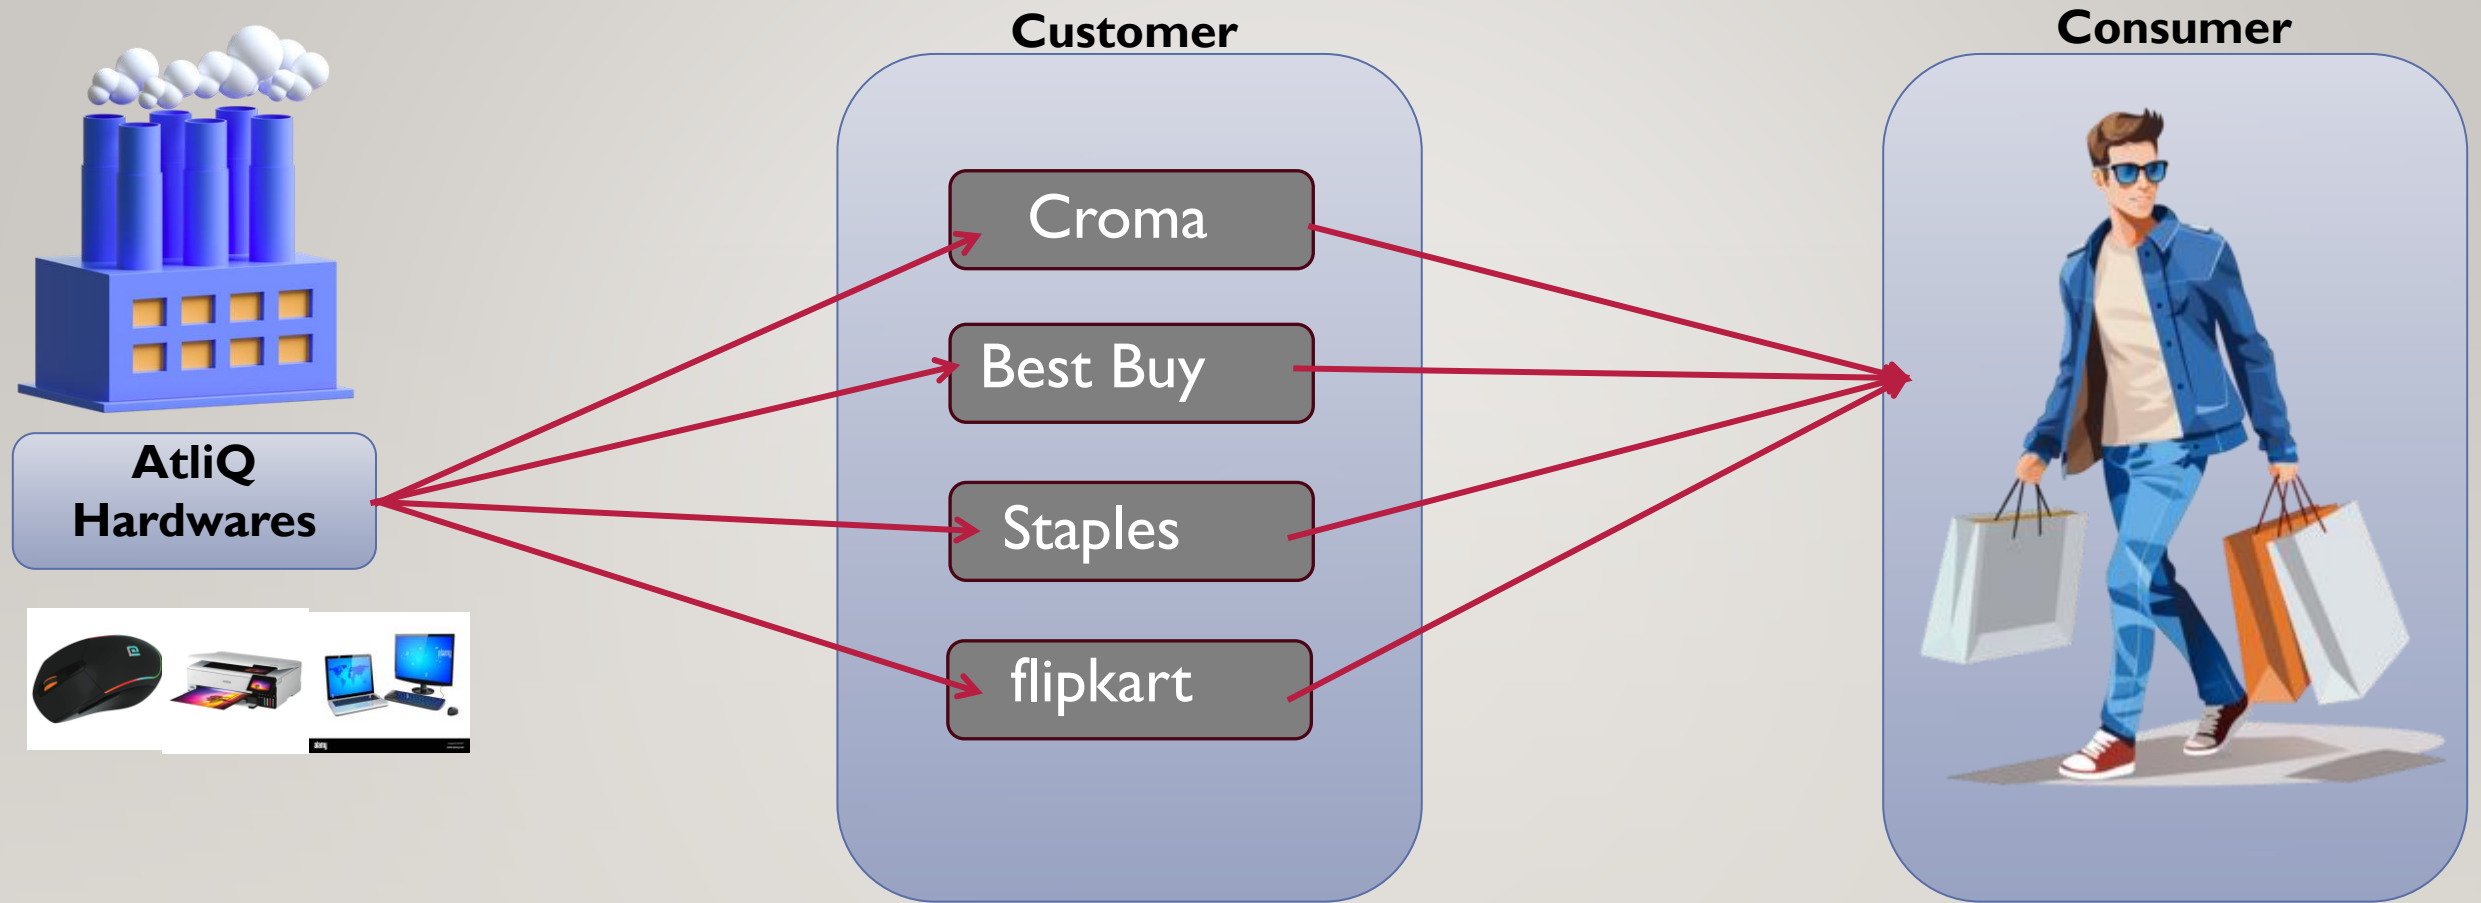

- AtliQ Hardware, a leading company specializing in PCs, printers, mice, and computers, has a global reach.
- The expanding size of Excel files has led to performance problems, resulting in unresponsiveness and inefficiency.
- AtliQ Hardware has launched a project to tackle this issue by assembling a team of data analysts.
- They will utilize MySQL as their database management system to extract meaningful insights from the data.
- These insights will empower the company to enhance decision-making and optimize operations, ultimately boosting overall performance.

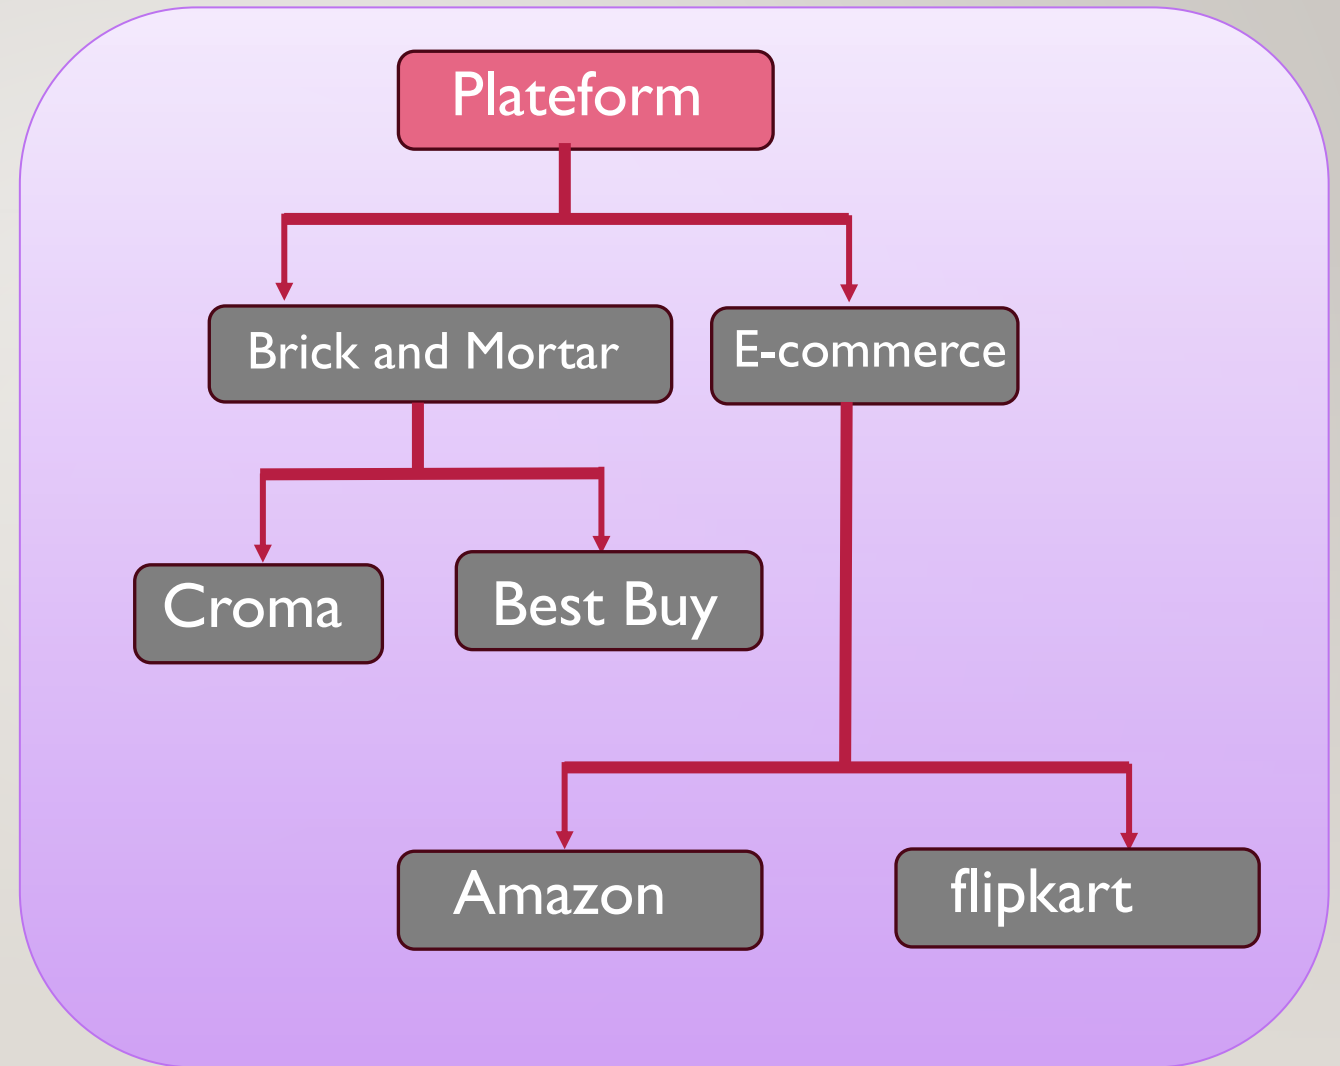

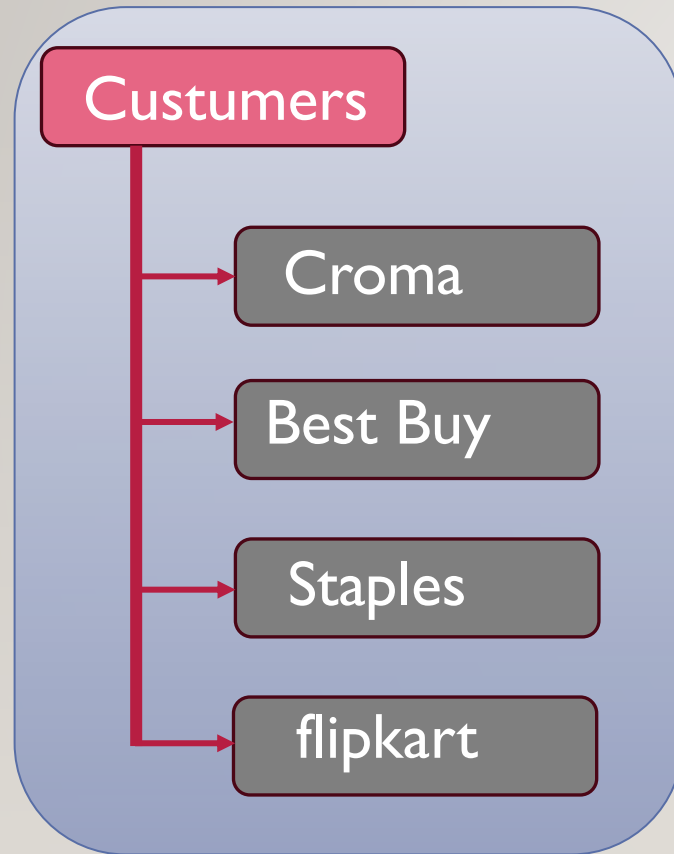

Project Overview

- This project is designed to analyze and extract valuable insights from the provided database. The database contains information about sales, products, customers, and regions for AtliQ Hardware. The aim is to address specific questions related to sales reports, market analysis, customer behavior, and supply chain forecasting.
